David Ratliff
TJ Russell, tjrussel@imagenetconsulting.com
Renee DiBicarri, rdibicarri@imagenetconsulting.com
Juan Fernandez, jfernandez@imagenetconsulting.com
Wayne Carlson, wcarlson@imagenetconsulting.com

Our mission is simple. Provide information technology solutions that improve our client's bottom line. To accomplish our mission, we train our consultants to optimize and enhance the management of business processes.

In most cases, this has changed little since the 1600's. While technology changes at an ever increasing pace, business processes driven by the movement of paper have not. Many studies reveal the inefficiencies of paper-based processes. While most business professionals agree with these findings, they do not possess the time or expertise to evaluate and improve the situation. This is where ImageNet Consulting defines its value proposition; uncovering problems, consulting and evaluating options, then delivering on solutions that enhance productivity while reducing costs and positively impacting the business' bottom line. ImageNet Consulting provides a vast array of solutions and experience to manage business processes. The most compelling argument to allow our company to help improve these processes is our independence from manufacturer ownership. The independence allows our company to deliver best-in-class solutions with flexibility not offered by a single line dealer or manufacturer. Through our manufacturer-agnostic and solutions-led approach, we are able to offer best-in-class technologies to meet our customer's needs. This requires a clear vision of the future and a nimble company that constantly reinvents itself while keeping ahead of the latest technology developments.

Martha Rongey, m_rongey@sbcglobal.net

Odyssey of the Mind is an international educational program that provides creative problem-solving opportunities for students from Kindergarten - college. Teams apply their creativity to solve problems ranging from building mechanical devices to presenting their interpretation of literary classics. Competition is on the local, state, and world level. Thousands of teams from throughout the U.S. and from about 25 other countries participate in the program.

Why Your School Should Consider Joining the OPSRC

- *Access to fantastic talent: the OPSRC's five directors are some of the most talented folks in their respective fields of finance, technology, teaching and learning, communications and legal counsel, in the state. As a member, you full access – phone and email – to all five individuals.*
- *Professional development: With membership in the OPSRC, you get access to all of our professional development both in person and online. See our website for details on all scheduled events. If you have a specific training request, we will work hard to accommodate your request. Furthermore, we allow schools – with SDE approval – to use Title II funds should they want access to our PD.*
- *PD 360 Access: members that attend our training events affiliated with PD 360 will receive log-ins to PD 360. These licenses are annual licenses and provide full access to the PD 360 catalog.*
- *Website offering: We have developed a cutting edge website offering that provides significant cost-savings to schools. Schools pay a one-time fee of \$750 to establish the new site. We train you to manage your site and the only ongoing cost if \$100/year.*
- *NWEA subsidy: The OPSRC provides a significant subsidy for use of NWEA's Measuring Academic Progress tool. Details on the subsidy are as follows:*
 - *NWEA pricing is a 3-year-tiered system*
 - *Year 1 – the district pays \$4.50 per student and OPSRC pays \$8.00*

- Year 2 – the district pays \$6.50 per student and OPSRC pays \$6.00
- Year 3 – the district pays \$8.50 per student and OPSRC pays \$4.00
- Professional Development is a requirement when purchasing MAP and your district pays \$1000 for the “Getting Started with MAP” online; NWEA and OPSCR will host regional training workshops representatives MPG training. Anyone from your district can attend.
- Digital Learning Opportunities: We have a digital catalog containing over 1,600 course that are all approved by the state and available for schools to offer their students. Unlike most options available on the market, schools pay on a per student/course basis and there’s no commitment and/or minimum requirement. We have negotiated a discounted rate so you won’t find these courses available anywhere for less.

For more information and details on our services, check us out at www.opsrc.net

Oklahoma School of Science and Mathematics (OSSM)

Oklahoma City, OK 73104

Dr. Cindy Brown, cbrown@osrhe.edu
Matt Higdon, mhigdon@osrhe.edu
Lisa Nelson, lnelson@osrhe.edu

College readiness is more than academic preparation. The aspirations of students and their families to achieve a college degree require guidance and support beginning at an early age, not just the senior year of high school. The Student Preparation Office of the Oklahoma State Regents for Higher Education helps PK-12 educators and parents effectively prepare students for college readiness. Through online resources, regional workshops, on-site training and retreats, the student preparation team provides educators, parents and students with the resources necessary to ensure all Oklahoma students and their families are college ready.
